

Aquarium Drawing File
10th anniversary

はじめに

熱帯魚のイラストを初めてちょうど10年目になりました。

本書は10周年を記念した記念本となります。

初めて熱帯魚のイラストを描いたのは *Sturisomatichthys festivus* でした。

ネットのアクア仲間から友人がステッカーを作りたいので何か描いて欲しいと頼まれたのが最初でした。

私はそれまで魚のイラストを描いたことがなく、当時飼育していた魚を描きました。

その後、ナマズ系のイラストを描き、*Corydoras* のイラストが *Amazonas Magazine* をはじめ、書籍や論文などに掲載されました。

その後、*Aquarium Drawing File* シリーズとして様々な種類を描き発表してきました。

10年が経過し、描いた魚の種類は1500種に及びました。

ここで一度区切りとして本にまとめたいと思います。

熱帯魚や淡水魚を描くにあたり、魚の同定や写真提供などに協力していただいたアクアリストの仲間に感謝します。

Introduction

It's been exactly 10 years since I first drew illustrations of tropical fish.

This book is a commemorative book commemorating the 10th anniversary.

The first illustration of a tropical fish was *Sturisomatichthys festivus*.

It first started when a friend of mine on the internet asked me to draw something for him because he wanted to make stickers.

I had never drawn an illustration of a fish before, but I drew the fish I was breeding at the time.

After that, I drew illustrations of catfish, and *Corydoras*' illustrations were published in books and papers, including *Amazonas Magazine*.

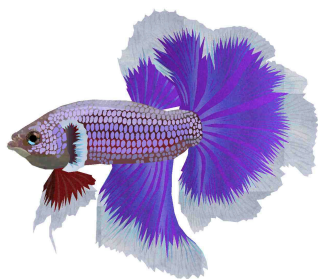

After that, I drew and presented various types as part of the *Aquarium Drawing File* series.

After 10 years, I have drawn over 1500 types of fish.

I would like to summarize this in a book as a break.

I would like to thank my fellow aquarists for their help in identifying fish and providing photos for my drawings of tropical and freshwater fish.
